EFSTACOPOLS PRESENTATION

More than 50 years ago, Efstathios Ch. Constantinides Ltd pioneered the swimming pool industry in Cyprus, becoming the island's first dedicated pool company. What started as a vision to introduce high-quality pool solutions has grown into a legacy of trust, innovation, and excellence.

From private residences to five-star resorts, Efstaco Pools has played a vital role in shaping Cyprus' aquatic landscapes. With thousands of successful installations across the island, the company has built a reputation for reliability, technical expertise, and an unwavering commitment to quality.

At the heart of Efstaco Pools is a team of passionate professionals who bring decades of experience to every project. Their expertise, combined with cutting-edge technology and world-class suppliers from the USA, Europe, the Middle East, and Asia, ensures that every pool is designed to perfection.

Efstaco Pools is more than just a pool company—it is a trusted partner in creating spaces where families relax, resorts welcome their guests, and communities come together. Whether crafting an infinity pool with breathtaking views or a serene backyard retreat, the company delivers tailored solutions that blend aesthetics with functionality.

Today, Efstaco Pools continues to set the standard in the industry, driven by a philosophy of excellence and a deep-rooted commitment to customer satisfaction. The journey that began in the 1970s has evolved, but one thing remains unchanged—Efstaco Pools is the name Cyprus trusts for quality swimming pools.

SOPREMA PRESENTATION

The Soprema Group

Founded in 1908, SOPREMA is a global leader in waterproofing, roofing, and insulation. With 128 factories, over 120 subsidiaries, and operations in 90 countries, Soprema Group provides high-quality solutions for construction and pool waterproofing under SOPREMAPOOL brand.

Innovation & Sustainability

The advanced R&D ensures cutting-edge, high-performance products. Committed to sustainability, manufacturing energy-efficient solutions and promote circular construction, with production plants ISO 14001 certified for environmental management.

Expertise & Training

Offering specialized training programs for the correct products installation, supporting industry professionals with expert guidance.

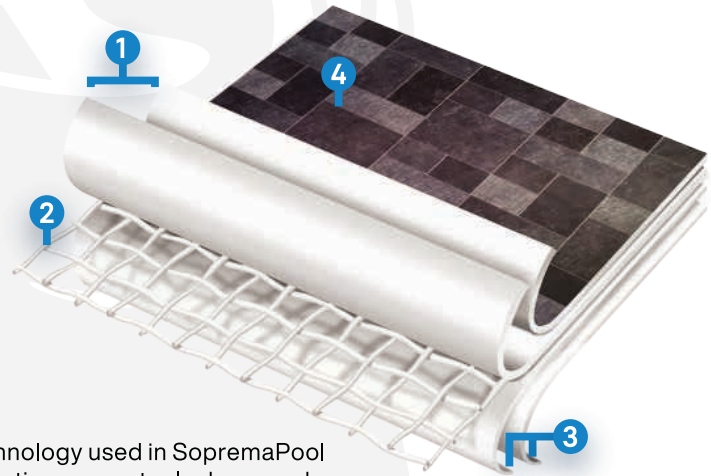

SOPREMAPOOL 4-layer membranes

Reinforced synthetic membranes manufactured by cast process, using high-quality raw materials including resins, plasticisers, stabilisers, and pigments.

These membranes are composed of four layers with distinct, complementary formulations, incorporating a polyester reinforcement between the second and third layers. This reinforcement enhances the membrane's tensile strength and dimensional stability.

The formulation and production process are specifically designed to meet the rigorous performance standards outlined in the European EN 15836-2:2010 standard.

- 1 HIGH PERFORMANCE PVC: LAYERS 1 & 2
- 2 POLYESTER REINFORCEMENT
- 3 HIGH PERFORMANCE PVC: LAYERS 3 & 4
- 4 LAQUERING FINISHING

Product advantages

- **Optimal welding:** The advanced welding technology used in SopremaPool membranes ensures perfect seam integrity, preventing any water leakage and enhancing the overall durability of the installation.
- **UV resistance:** Designed to withstand harsh UV exposure, SopremaPool membranes retain their colour and structural integrity over time, making them ideal for both outdoor and indoor pools.
- **Resistance against microorganisms with "Bio Shield" treatment:** The "Bio Shield" treatment ensures long-lasting protection against algae, bacteria, and other microorganisms, preventing molecular changes and guaranteeing a cleaner, more hygienic pool environment.
- **Impact resistance:** SopremaPool membranes are built to endure physical impacts, making them resistant to punctures and tears, which can be a common issue with traditional liners.
- **High mechanical resistance:** The layers of the membrane are engineered for high tensile strength, ensuring that it can handle the demands of regular pool usage without compromising on performance.
- **Chemical resistance:** Resistance to the standard chemicals used for pool water treatment, including chlorine, bromine, and salt, ensures they maintain their performance even in chemically challenging environments.

SOPREMAPOOL 3D

Recreates the shapes, touch & feel of natural materials.

The **SOPREMAPOOL 3D** line is a 1.8 mm reinforced PVC membrane for lining pool basins, supplied with a non-slip embossed finish for barefoot comfort.

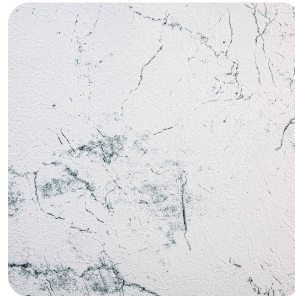

Cast-process manufacturing builds four layers around a perfectly centred polyester mesh, delivering high waterproofing performance, rapid installation, and eye-catching 3-D textures. A factory-applied varnish top-coat boosts resistance to colour fading, chlorine, stains, microorganisms, and UV rays.

Features

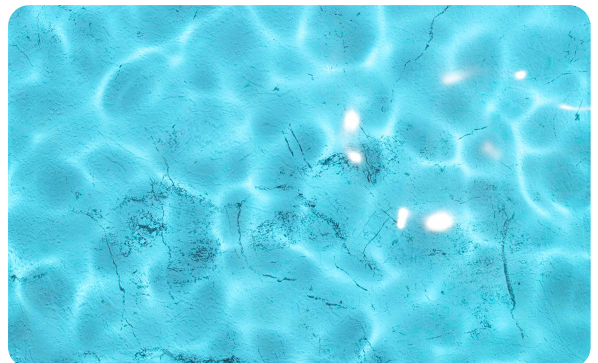

- Attractive, stylish 3D designs
- Easy, fast installation
- Sensory "soft-touch" surface
- Varnish coating for long-life colour
- Multiple exclusive patterns & colours

Key specs

- Thickness 1.8 mm
- Slip rating Class C
- Warranty 12 yrs

SOPREMA^{POOL} FEELING

Feel its new texture through touch.

The SOPREMA^{POOL} FEELING line is a 1.5 mm unicolour, reinforced PVC membrane for waterproofing and lining pool basins. A cast-process build layers four sheets around a perfectly centred polyester mesh, providing high resistance to weathering, UV radiation and microorganisms. The surface carries a new non-slip, embossed finish that is noticeably soft underfoot and certified Class C for slip prevention—ideal for steps, beaches and shallow areas.

Features

- Easy, fast installation
- Sensory “soft-touch” experience
- Deeper embossing for surer footing

Key specs

- Thickness 1.5 mm
- Slip rating Class C
- Warranty 10 yrs

SOPREMA^{POOL} DESIGN

Exclusive patterns with varnish-coated protection.

The SOPREMA^{POOL} DESIGN line offers 1.5 mm reinforced PVC membranes in a wide choice of printed designs for lining pool basins. Cast-process manufacturing bonds four layers around a perfectly centred polyester mesh, delivering flexibility and smoothness while ensuring watertight performance. A factory-applied varnish top-coat increases durability and shields colours against fading, chlorine, stains, microorganisms and UV rays.

For extra grip on steps or beach areas, the Bali and Marbella Blue designs are also supplied as SOPREMA^{POOL} GRIP—the same membrane with an embossed, Class C non-slip finish.

Features

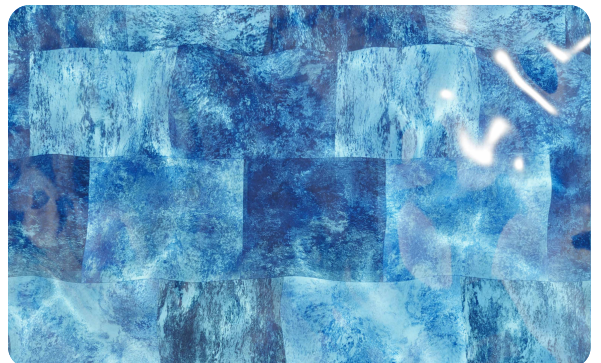

- Flexible, easy to handle
- Smooth surface for effortless cleaning
- Varnish coating for long-life colour
- Exclusive printed patterns

SOPREMAPOOL PREMIUM

Intense colours with long-life, varnish-coated protection.

The SOPREMAPOOL PREMIUM line delivers 1.5 mm reinforced PVC membranes in a rich palette of solid colours for lining pool basins. Cast-process manufacturing embeds four layers around a perfectly centred polyester mesh for flexibility, smoothness and lasting watertightness.

A factory-applied varnish top-coat boosts durability and shields hues from fading, chlorine, stains, microorganisms and UV rays.

Every colour is also offered as SOPREMAPOOL GRIP—an embossed, Class C non-slip finish ideal for steps and shallow zones—except Dark Blue and Wild Musk, which remain smooth only.

GRIP membranes share the same physical and mechanical properties as the standard PREMIUM range.

Features

- Flexible, easy to handle
- Smooth surface for effortless cleaning
- Varnish coating for superior colour longevity
- Intense, uniform colour tones
- Wide choice of hues
